**Course**

General English

I have been in New Zealand for four months. My wife and I have attended a Crown course from three days after our arrival in New Zealand. This is a very good place for studying English because it is located in Auckland City's downtown. In the afternoon you can enjoy walking around Queen Street and having a cup of coffee.

I have made a lot of wonderful friends among the teachers, the office staff and classmates. They are helpful and caring. Teachers plan the classes carefully and by being patient they help the students to improve their English.

The Director of Studies has designed sophisticated study options for students. For instance, I studied an IELTS preparation course and the outcome was fabulous because I got a very good score.

There are a lot of facilities here for students to improve their English such as: computer room, self-access centre and language lab and if you have your own laptop you can use the free wireless internet connection. Students can choose the activity option to travel around the Auckland area and learn different things about New Zealand while visiting diverse places.

I thoroughly recommend Crown to everyone who wants to come to New Zealand to improve his/her English.
