

**Name**

Mahana Wohler

**Program**

General English

**Nationality**

Tahitian

When I started at Crown last year, it was a difficult time for me because I was separated from my friends and family. However, three weeks later I was feeling better about the school and the new environment because my teachers were very helpful and kind and because New Zealand is a beautiful country and there are lots of places to visit. Also, my counsellor was always there for me to assist with any problems I met.

The course was very useful and being in an English language environment I felt my English improve because I was practicing all the time. Crown has many different course options depending on what you want to achieve and how you want to study.

You can just take General English but if you want to improve faster or if you want go on to further study you can take programmes like Exam Skills and IELTS preparation that require more work. In March I took the TESOL course that prepares you for being an English teacher. This was the most challenging course I've ever tried but I could experience what a real teacher feels.

When I finished in June I was sad because I had become really close to my teachers and my counselor. Crown is a great place to learn English and I really enjoyed the time I spent there.
